Apache Cassandra 3.x Developer Certification

Total 258 Questions : Highest number of Questions : 95% Questions with explanations

Among all the NoSQL databases available in the market, currently Apache Cassandra is the leader among all. And they have proved that this is one of the fastest and no single point point of failure database. Even it is setup across the datacenter or in the Hybrid Cloud. And Fortune 500 organization already started using Cassandra database in the production. And behind all this Datastax continuous support to the Cassandra database was one of the main driver.
